

# MEGA TILE-SEAL

ULTRA FLEXIBLE WATERPROOF LIQUID TILE GROUT  
FOR TILES, BATHTUBS, WASHBASINS & MORE

## PRODUCT DESCRIPTION:

The ultimate solution for gap-filling in tiles, bathtubs, washbasins, bathrooms, and beyond. Achieve a flawless, waterproof finish effortlessly, ensuring both durability and aesthetic appeal. Make perfection a reality with Mega Tile-Seal.

## KEY FEATURES:

- 1. Waterproof and Moisture-Resistant:** Mega Tile Seal's advanced formula ensures that your tile joints remain impervious to water and moisture. It forms a robust barrier, preventing water infiltration and protecting the underlying surfaces.
- 2. Superior Durability:** With Mega Tile Seal, you can trust that your tile installations will stand the test of time. This grout is engineered to resist cracking, shrinking, and color fading, ensuring that your tiles maintain their original luster and strength.
- 3. Versatile Color Options:** We offer ten standard colors to complement various tile designs and color schemes. Additionally, we provide custom color options, allowing you to match the grout precisely to your project's unique requirements.
- 4. Easy Application with Integrated Nozzle:** Mega Tile Seal sets itself apart with its innovative nozzle applicator. This built-in feature simplifies the application process. Just place the bottle's nozzle directly over the tile joints, apply gentle pressure, and watch the grout flow smoothly and evenly.

5. **Suitable for Various Tile Types:** Whether you are working with ceramic, porcelain, glass, or natural stone tiles, Mega Tile Grout is compatible with a wide range of tile materials, making it a versatile choice for all your tiling needs.

6. **Ideal for Indoor and Outdoor Use:** Whether you're tiling a bathroom, kitchen, patio, or pool area, Mega Tile Seal provides reliable performance in both indoor and outdoor environments.

## USAGE GUIDELINES:

1. Begin by preparing the tile joints and ensuring they are clean and free from debris.
2. Place the bottle with the nozzle directly over the tile joints.
3. Apply slight pressure to the bottle to release the grout.
4. Allow the grout to flow smoothly into the joints.
5. Use a scrapper to wipe off excess grout from the tile surfaces.
6. Allow the grout to cure for the recommended time.
7. For custom color orders, please provide specifications when placing your order.

## Technical Data

Appearance:	Smooth, paste-like consistency
Odor:	Mild
Density:	1.2 g/cm <sup>3</sup>
Solids Content:	90%
Viscosity:	8,000 - 10,000 cPs
Tack-Free Time:	Approximately 1 hour at 25°C
Full Cure Time:	24-48 hours at 25°C
Shore A Hardness:	75 (after full cure)
Tensile Strength:	2.5 MPa
Elongation at Break:	≥600%
Chemical Resistance:	Resistant to common household chemicals
UV Resistance:	Resistant to UV exposure
Mildew Resistance:	Excellent resistance to mildew growth
Temperature Resistance:	It can withstand temperatures ranging from -20°C to 60°C
Packing:	Each bottle contains 600gm with an integrated nozzle applicator
Coverage:	150 to 200 rft, depending on application thickness and tile size.
Shelf Life:	12 months at room temperature; proper storage extends product longevity.
